

Invitation

International Bioenergy Days is an event intended to stimulate the demand for environmentally-responsible technology. Seminars and study trips will describe and show leading examples of environmental technology and working solutions. Swedish knowledge and experience of applications of bioenergy is widely recognised, with western Sweden being a particularly good showcase of successful concepts with substantial potentials.

The commercial potential of bioenergy is enormous. Both the EU Parliament and the Obama administration in the US will be introducing requirements and legislation that will support green businesses.

The International Bioenergy Days provide an excellent opportunity for learning of the latest advances and making contacts that will help you to take the next step.

We look forward to seeing you at the conference, which will present a valuable content in attractive surroundings. Company managers, contractors and decision-makers from Sweden, the rest of Europe and, not least, from the USA, will share a common interest in the business of bioenergy technology.

TROLLHÄTTAN – LIDKÖPING
West Sweden • 28-30 Sept 2009

International Bioenergy Days is being held in association with the Swedish EU presidency in autumn 2009.

International Bioenergy Days, West Sweden Trollhättan-Lidköping 28-30 Sept 2009

Concrete applications and solutions in the field of bioenergy

Don't miss the opportunity to find out about the widely recognised climate change solutions here in western Sweden. During our study visits, you will be able to see successful concepts and talk to the people behind these ventures.

1. BIOFUELS FOR VEHICLES

Find out how waste, manure and other sources of renewable energy are converted into fuel.

2. BIOENERGY FOR HEATING AND ELECTRICITY

See the entire chain from small-scale upgrading of raw materials to the use for larger premises as well as for domestic end use.

3. POLITICS AND SOCIETY

An understanding of the decision-making processes and dialogues for successful implementation of bioenergy schemes is just as important as the technology.

If you book today, you will be entered for the early booking prize draw.

PS! The conference fee will not be charged until 1 september

We are currently compiling the programme, and make reservation for possible changes. See www.bioenergydays.com for up-to-date details of the programme and speakers.

A few voices from the International Bioenergy Days in Minnesota 2008

"The arrangement was very useful to us. It was an extremely pleasant conference that we would be pleased to have repeated. Ecoera was given the opportunity to strengthen its ties with our American partner company. In addition, we established many good contacts, and have also strengthened our connection with American research."

David Andersson Ecoera AB

"We established contact with many firms that could be of interest for the launch in Minnesota"

Jonas Bergman, Radscan Intervex AB

"We established good contacts and will be delivering our first order to the USA in the coming days."

Thore Fridhill, Pellvac

International Bioenergy Days 2009 West Sweden Trollhättan-Lidköping 28-30 Sept 2009

The conference is arranged in the neighbouring municipalities of Trollhättan and Lidköping. Most of the events are common to both, and transport between venues will be provided.

While here, why not take the opportunity to see something of western Sweden's unique landscape, between the bare rocky coastline in the west and the green edges of Lake Vänern. The country between ranges from plateaued upland to lush farmland.

Don't forget, too, that the exchange rate is in visitors' favour: Advanced bookings from, for example, Chicago to Gothenburg start from USD 665, while a (3-star) hotel double room costs USD 97 per night (*prices as of 7th April 2009*).

And, of course, if you would like to extend your stay, to see more of our beautiful country, we will naturally be pleased to arrange your trip. Just let us know what you're interested in.

**Last date for booking: 15th August via www.bioenergydays.com
Book before 1st July for a reduced price.**

Programme in co-operation with Bioconsultancy, Business Region Göteborg, Connect Väst, Ekocentrum, Energikontor Sydost, Europeiska Gasföreningen, Swedish Trade Council, Swedish Chambers of Commerce, Sustainable Business Hub and Swentec. A special word of thanks to the American Embassy in Stockholm.
